Interested in Wildlife Health?
Check out this College Intern II position with the Alaska Department of Fish and Game in Fairbanks!

Brief Position Description:
This internship will introduce the student to wildlife disease surveillance, wildlife health assessment, laboratory techniques and wildlife veterinary science. This position does not involve live-animal capture field work or any animal husbandry.

Job Duties Include:
- Observe and assist with postmortem examination and sample collection
- Blood and tissue sample inventory and processing
- Necropsy lab preparation, cleaning, and disinfecting
- Prepare samples for shipment to diagnostic labs
- Lab test result entry and filing, both paper and electronically
- In-house lab analysis of wildlife samples.
- Data recording and entry

Well- qualified applicants will have the following:
- Must be enrolled in 300-level equivalent courses or higher in a degree program such as wildlife, biology, or natural resources
- Completed a minimum of 24 semester (36 quarter hours) course work including 1 semester of college level chemistry and 1 course in anatomy
- Proficient in Microsoft Word, Access, and Excel programs
- Must be able to work with strong-smelling biological material (i.e. blood, dead animal carcasses and fecal material) and chemicals in a laboratory environment
- Demonstrable interest in wildlife disease, epidemiology, or veterinary science as a career goal
- Good writing skills
- Good attention to detail

Work Schedule:
- Start Date: Approximately February 1, 2022
- Minimum of 10 hours per week during the semester
- Full time per week during the summer

Job posting closes December 14 at 5pm.

See job posting for details and how to apply.
