Seeking **SENIOR SPATIAL ANALYST** for **AUDUBON ALASKA** to join our leadership team for the National Audubon Society's state office. The Senior Spatial Analyst will support Audubon’s conservation science and policy initiatives in Alaska. They will collect, map, and analyze spatial biological data, social science data, review scientific literature, and prepare maps, reports, community engagement materials, and scientific publications. The emphasis will be on compiling, managing, analyzing, and preparing products using geospatial data on Alaska’s wildlife, habitats, cultural and traditional resources and socio-political uses and boundaries. They will apply advanced skills in data management, landscape analysis, map design, and scientific writing related to a variety of projects across Alaska. Biological or social science background preferred. For full position description and application instructions, please visit: [https://careers-audubon.icims.com/jobs/4203/senior-spatial-ecologist/job](https://careers-audubon.icims.com/jobs/4203/senior-spatial-ecologist/job). Position is open until filled. For questions, please email: ndawson@audubon.org.

Please let me know if you need any further information.
