Greetings,

Cornell University is seeking a Ph.D. or M.S. student to work on Great Lakes coregonid ecology.

The student will be jointly advised by Dr. Suresh Sethi and Dr. Lars Rudstam in the Department of Natural Resources, and will have opportunity to work closely with Dr. Brian Weidel at the USGS Great Lakes Science Center. Project questions will include acoustics assessments, species distribution dynamics, and early life history of Great Lakes coregonids. Work will include opportunities to partake in fish survey cruises on Great Lakes, and will utilize a range of statistical modeling techniques to address research questions about coregonid ecology.

The anticipated start date is Summer 2018; first review of applications = Jan. 8, 2018. Details are attached, or available at this link.

Thanks for your interest!
