SKI & STUDY IN ALASKA
CLIMATE, SNOW, PLANTS, & YOU

Winter Research Internship Offered in Denali

The Denali National Park Botany Team is looking for candidates skilled at winter backcountry travel and ecological research for a Scientists-in-the-Parks internship position running from January 24, 2022 through April 15, 2022.

This is a unique opportunity to spend the winter and spring seasons in Denali National Park while contributing to a new project studying the relationship between snow depth and vegetation.

The intern will gain valuable experience planning for and conducting complex winter fieldwork, maintaining technical equipment, and processing and summarizing data with R.

Join our team studying vegetation, snow distribution and change in subarctic Alaska! Search the Scientists-in-the-Parks website for ID# 2021353 to view full details about the position and learn how to apply.

Combine your passion for winter recreation with your study of Ecology or Biology

Experience the Northern Lights and magic of a subarctic winter

3-month internship runs January - April 2022

Benefits include housing, travel stipend, $400 per week, and possible AmeriCorps education award

Apply by June 13th!
