The Kenai Watershed Forum (KWF) seeks up to three interns to work on a variety of field-based environmental projects for the summer of 2018. Work may include physical and chemical water quality monitoring, invasive species identification and eradication, fish passage surveys, mapping salmon habitat, collecting stream temperature data, and measuring stream discharge. Positions are expected to consist of approximately 70% fieldwork and 30% office time. Applicants will conduct fieldwork with KWF staff and will be expected to work independently on lab procedures, equipment calibration and maintenance, and data analysis/reporting. Must have a healthy respect for working in bear country and in remote settings. Applicants must be in good physical condition for backcountry hiking, equipment transport, and occasionally strenuous fieldwork. Traveling by boat, 4WD truck, and/or 4-wheeler may be required.

**HOW TO APPLY**

Limited to undergraduate college students (sophomore or above) in good academic standing, enrolled in a hydrology, biology, geology, civil/environmental engineering or related major program. Preference given to those who demonstrate a desire to pursue an environmental career.

Please email a one page letter of interest/cover letter and a one page resume along with contact information for three references to rhonda@kenaiwatershed.org. Applications not conforming to these requirements will not be considered.

When you apply, please indicate that you are responding to the posting on Conservation Job Board.
