Students across Alaska are invited to apply for internships with NASA for this coming summer season. Opportunities exist at NASA facilities across the country from California to Virginia. Previous interns from Alaska have assisted with design projects that will be utilized during the next Mars mission, as well as having tested Unmanned Aerial Vehicles for agricultural applications here on Earth. The possibilities for networking and career exploration are unparalleled.

The Summer Internship Application for 2018 is now open until March 1, 2018. Summer Session opportunities are usually 10 weeks in length, and begin in late May or early June and end in early August.

NASA offers professional development and leadership opportunities to students through their Academy and Internship programs. The application process is run through OSSi:SOLAR. A NASA-wide system for the recruitment, application, selection and career development of undergraduate and graduate students primarily in science, technology, engineering and mathematics disciplines. Opportunities for students in other disciplines are also available.

To be considered for a NASA summer internship, the NASA centers often seek sponsorship from the Alaska Space Grant program. In order to be considered for sponsorship from Alaska Space Grant, you must submit the form provided here by February 1st: Request ASGP Sponsorship for NASA Summer Internship

It is highly recommended that you apply early. Sponsorship by the Alaska Space Grant program is on a first-come-first-served basis for strong applicants.

Interested students should visit the OSSi Frequently Asked Questions page for more information on application requirements and eligibility.
