Re: 2018 Lloyd Noble Scholars in Plant Science Internships

We are excited about the upcoming summer and how it could impact your students.

Enclosed is a program poster for the 2018 Lloyd Noble Scholars in Plant Science Program. Our program offers qualified undergraduates a paid, summer, research internship in plant science.

Summer Research Scholars work side-by-side with a mentor scientist and laboratory members from the Noble Research Institute. Scholars undertake a research project pertinent to ongoing research programs; they become part of a research environment and participate in their laboratory’s activities in addition to their own research project. Importantly, Scholars see more than just research—they see how research impacts agriculture and contributes to the scientific community. At the conclusion of the program, Scholars present their findings to the Noble Research Institute’s community of researchers and scientists.

Please display our poster at an appropriate location and encourage your interested students to apply. The application deadline is February 6, 2018.

Thank you for your help in this matter. If you have any questions or need additional information, including past scholar research summaries, please contact me at cfhardin@noble.org or by phone (580) 220-1106 or visit our program web page at www.noble.org/summer-scholar.

Best regards,

Frank Hardin, Ph.D.
Youth Education Manager
