SLR International Corporation  
Project Scientist or Engineer (Fairbanks, Alaska)

Synopsis
SLR International Corporation is seeking a Project-level Scientist or Engineer with 4-12 years’ experience to join our Fairbanks, Alaska operations. The position is a full time, permanent position, supporting our air quality, water, wastewater, spill plans, and land quality work load. Preferred candidates will have experience in consulting and/or industry, preferably focused on Alaska projects. The successful candidate will possess a Bachelor’s of Science in environmental engineering or environmental sciences, and preference will be given to candidates with an advanced degree.

Required Qualifications
- B.S. Environmental Engineering, Environmental Science, or equivalent
- Excellent knowledge of Microsoft Excel and Word
- Excellent analytical, organizational, and multitasking skills
- Working knowledge of permitting regulations
- Possess valid driver’s license and good driving record

Preferred Qualifications
- Experience in technical writing
- Experience in one or more of the following: air quality, water, wastewater, spill plans, or land quality (groundwater, surface water, and soil sampling; hazardous materials surveys and sampling; and/or groundwater and contaminant transport modeling software)
- Experience reviewing and interpreting regulatory requirements
- Knowledge of Alaska resource development facilities and operations desirable
- Alaska resident

Personal Attributes and Traits
- Self-motivated and detail oriented
- Able to effectively prioritize work and contribute to project teams
- Excellent time management skills
- Excellent verbal/written communication skills
- Dependable and predictable
- Professional work ethic

Physical Demands
Position is office-based, but field work and travel may be required as part of this position. With or without reasonable accommodation, employees may be required to perform the following activities:
- Work in extreme environmental conditions, including an Arctic environment
- Work and stay for extended periods in work camp environments
- Travel in small aircraft, including helicopters, to remote locations
- Close vision, distance vision, peripheral vision, fine discriminate detail, and depth perception
- Frequently required to walk or climb stairs
- Climb a ladder
- Stoop, kneel, crouch, or crawl
- Handle large items
- Lift and/or move equipment weighing up to 50 pounds
