Region 2 is recruiting for a Fish and Wildlife Technician V based in the Soldotna office. This recruitment is currently open to Alaska Residents and closes on February 7, 2019 at 5:00PM.

This is a full-time permanent technician position. Under supervision of the area biologist, this position assists with wildlife management activities across the Kenai Peninsula (Game Management Units 7 and 15). This includes answering questions about hunting and trapping regulations, local hunting opportunities, hunter education, and wildlife viewing, responding to public concerns about wildlife, and spatial and categorical analysis of information. This position will also be involved in special projects on the Kenai Peninsula and throughout southcentral Alaska (Region II), including intensive management. Additionally, this position independently maintains the Department's Electronic Control Device (ECD) training program, including maintaining necessary certifications to train additional instructors and to train departmental and non-departmental staff on the application of ECDs for wildlife management and restraint.
