Job Category: Part-time student assistant, ≤ 20 hr/week

Salary: $10.50/hr

Start Date: Fall Semester

Website: https://uaf-ffel.weebly.com/

Description: The Freshwater Fish Ecology Lab (FFEL) at University of Alaska Fairbanks, Institute of Arctic Biology is seeking two part-time undergraduate student technicians to assist with research investigating the effects of fire on aquatic communities in interior Alaska boreal ecosystems. This position will start early-September and continue through fall semester and potentially into spring semester. Start date is flexible.

Duties: Primary lab duties include, but are not limited to: 1) sorting and identifying macroinvertebrate samples; 2) stable isotope sample preparation; and, 3) data entry and QA/QC. We seek a motivated student with interest in developing an undergraduate research project in conjunction with the paid lab work.

Qualifications: The ideal candidate will be conscientious, detail-oriented, interested in fisheries ecology, and a reliable self-starter. Applicants must be able to work independently with minimal supervision. Preference will be given to those with or pursuing a B.S. in fisheries or a related field.
