Fisheries Technician - Boreal Fish and Fire Project, Interior Alaska

**Agency:** University of Alaska Fairbanks, Institute of Arctic Biology

**Location:** Fairbanks, AK

**Job Category:** Seasonal, 40 hr/week

**Salary:** $15.25/hr

**Start Date:** 05/13/2019

**Housing:** Not provided

**Website:** https://uaf-ffel.weebly.com/

**Description:** The Freshwater Fish Ecology Lab (FFEL) at University of Alaska Fairbanks, Institute of Arctic Biology is seeking two seasonal fisheries technicians to assist with research investigating the effects of fire on aquatic communities and hydrologic regimes in interior Alaska boreal ecosystems. This position will start Mid-May and go through the end of August. Start date is flexible.

**Duties:** The primary duties include, but are not limited to: 1) conducting fish population and community surveys; 2) assessing stream habitat; 3) monitoring stream hydrology; and 4) performing data entry and QA/QC.

**Qualifications:** The idea candidate will be conscientious, detail-oriented, interested in fisheries ecology, and a reliable self-starter. Applicants must be able to work independently with minimal supervision, work well with others, work in occasional harsh weather conditions, be able to hike, willing to camp on occasion, operate four wheel drive vehicles, tow trailers, operate boats, and lift 50 lbs. Preference will be given to those with or pursuing a B.S. in fisheries or a related field.

**To Apply:** Send cover letter, resume, and three references to Deanna Klobucar ddklobucar@alaska.edu
