We are looking for a candidate to fill an 11-month position for a seabird biologist, stationed on beautiful Tetiaroa Atoll, French Polynesia. The candidate will be leading a nest monitoring program, managing a network of audio monitoring stations, and participating in capture and banding during periodic visits by the larger UW field team. This is an incredible training opportunity and does have the potential to be extended into a graduate program or post-doc depending on funding availability and the interest of the candidate. Salary is competitive and housing is provided. Please see details at: https://uwhires.admin.washington.edu/eng/candidates/default.cfm?szCategory=jobprofile&szOrderID=190874&szCandidateID=0&szReturnToSearch=1 and https://twitter.com/conversesj/status/1399828316257865731?s=20

Thank you,
Sarah
