Dear Colleague,

We’re writing to let you know that scholarship applications are now being accepted for the 2020 Summer Institute in Statistical Genetics (SISG) and the Summer Institute in Statistics and Modeling in Infectious Diseases (SISMID) (see below). The institutes will be held online this year and we are excited about the potential and accessibility of a virtual event and look forward to providing high-quality, online learning experiences for all participants.

Graduate students in all fields are encouraged to apply. The goal of the Summer Institutes is to strengthen the technical proficiency and career preparation of scholars from all backgrounds, especially those from groups historically underrepresented in STEM such as racial and ethnic minority groups, low income, first generation college students, veterans, and differently abled and 2SLGBTQ groups.

Please forward this information to any student or colleague who might be interested in attending and contact uwbiost@uw.edu if you have questions.

Sincerely,

Bruce Weir, Director, Summer Institute in Statistical Genetics  
M. Elizabeth Halloran, Director, Summer Institute in Statistics and Modeling in Infectious Diseases
